Information

HIGHLANDS NURSERY SHIPMENTS are made from Pineola, N. C., freight station, and prices in this list are made on this basis. Freight and express rates gladly quoted. Via Norfolk Steamship Lines, deliveries to northern and eastern points are quick and rates low.

SALEM NURSERIES SHIPMENTS are made from Salem direct, and Salem price-list must be used in ordering. Prices are about 25 per cent. higher than for similar stock at our main Highlands Nursery. A fine stock of specimen Rhododendrons, Azaleas, Conifers, etc., may be seen at Salem Nurseries, and deliveries to eastern points rarely take more than a day or two.

SHIPMENTS OF "COLLECTED" RHODODENDRON MAXIMUM AND KALMIAS are from our special fields in Pennsylvania and the South, depending on destination and quality of stock desired. The best clumps come from the South from high altitudes.

"COLLECTED" RHODODENDRON CATAWBIENSE AND RHODODENDRON PUNCTATUM come only from the South.

OUR NURSERIES ARE UNIQUE, being the first and only to grow Native American Ornamentals, and we now have the only large and complete stock of Hardy American plants in existence.

THE LOCATION OF HIGHLANDS NURSERY also is unique, an elevation of 3,800 feet insuring unquestioned hardiness.

SHIPPING BEGINS IN SEPTEMBER, when we send out large Rhododendrons, Kalmias and other evergreens, and bulbs and herbaceous plants, general stock going out in October and November and in spring from about March 1 to May 15. Give shipping instructions, unless you wish to leave it to us. We use our best judgment, but assume no risk.

OUR EXPORT SHIPMENTS reach the most remote countries, in perfect condition; we have exported for over 25 years

and know how to pack.

A DESCRIPTIVE CATALOG, beautifully illustrated, is gladly mailed on request, and advice on the right way to grow Rhododendrons, Azaleas and other native plants gladly given.

HARLAN P. KELSEY, Owner

Cable Address **KELMONT-SALEM**

SALEM, MASS.

Where Kelsey's Hardy American Plants Are Grown.

HIGHLANDS NURSERY, under ideal natural conditions at 3,800 feet elevation in the southern Alleghanies, produces absolutely hardy stock for latitudes as far north as Ottawa, Canada.

SALEM NURSERIES carry specimen plants, and are a distributing point for New England.

SPECIALTIES: Rhododendrons, Azaleas, Kalmias, Leucothoes, Galax, Rare Ericaceæ Lilies, Trilliums, and the largest general collection of Hardy Native American Plants in existence, Carload shipments for mass planting. LANDSCAPE DEPARTMENT. Planting plans made and executed. Wild gardens, woodland "under" planting, bog and water gardens, rockeries. Broad-leaved Evergreen effects. Formal gardens. Send for Catalogs.

September and October is the time to successfully ship and plant Lilies, Trilliums, Cypripediums, Erythroniums and other Bulbs and many Herbaceous Plants.

HARDY AMERICAN AZALEAS

American Azaleas are among the choicest ornamentals, whether exotic or native, and were but rarely seen in cultivation before being disseminated by Highlands Nursery.

They are seen at their best when planted in large masses and in properly prepared beds, and they richly repay any unusual care given them. Like most ericaceous plants, they love deep, moist, well-drained soil, and these showy native species are particularly adapted to planting in shrub borders and with Rhododendrons, their brilliant blossoms being set off by a background of dark foliage. Azaleas can be successfully grown almost anywhere, following same instructions given for Rhododendrons. The complete hardiness of all the species we offer is unquestionable. No American shrubs equal the native Azaleas, particularly A. lutea, for woodlands and hillsides. Our cold Carolina mountains have added no more beautiful plants to gardens than these American Azaleas, not even excepting the magnificent broad-leaved evergreen Rhododendrons. My stock of Azaleas, especially A. arborescens and A. lutea is unequaled. Usually all sizes over 1 ft. are budded, and special attention is called to the larger-sized clumps, which are very heavy and a mass of buds. These are very desirable for immediate and permanent effect. Such specimen stock has never been offered before. For prices of Specimen Azaleas at Salem Nurseries, see page 22.

Azalea canescens

AZALEA ARBORESCENS. Fragrant White Azalea. In June the delightfully spicy fragrant white flowers, with pink stamens, appear in profusion, lasting for weeks. Becomes a spreading clump 3 to 6 feet broad in cultivation; easy culture. The foliage often colors striking

*Rhododendron Catawbiense, of the **Carolina Mountains**

Carolina Mountains

It is this magnificent Rhododendrum that over a hundred years ago was introduced into Europe, supplying, together with Rhododendron maximum and R. punctatum, color and hardy blood to the cultivated "hybrids," but with a consequent loss of hardiness; and so today, for American gardens where ironclad hardiness is essential, we must turn to the true original species, found on the loftiest, coldest peaks of the southern Alleghanies, where it attains a height of 20 to 30 feet.

Considering the extreme hardiness, color of flower, compact growth and remarkable texture of foliage, which is a deep, shiny green and far superior to the better known Rhododendron maximum, we can recommend the true native catawbiense as the finest for general use, withstanding exposure and extremes of temperature where other Rhododendrons fail.

Do not confuse this true species, which is absolutely hardy, with the common so-called catawbiense hybrid seedlings so freely imported from Europe, which is at best half-hardy, and even when branched above is a single stem, showing bareness underneath for years.

Unlike Rhododendron maximum, it is a very free bloomer, with foliage of a dark, rich, lasting green, which never rusts. The trusses are a bright red-purple, in marked contrast to the muddy purple of the semi-hardy half-breed imported variety, noted above and, as sent out by Highlands Nursery are always on their own roots.

For massing to produce a broad-leaved evergreen landscape effect, there is no plant equal to it in the latitude of the northern United States and Canada, where strictly hardy plants must be employed. As a rich, finished border to plantations of the commoner Rhodolendron maximum and Kalmia Luifolia, the value of Rhododendron cadaubiense cannot be overestimated.

Do not compare our many-stemmed clumps with the single-stemmed, "bushy" half-hardy Rhododendrons offered by importers. There is no comparison.

Rhododendron maximum, Extra Specimens

For those wishing perfect specimens I can supply a few cars "collected" of extremely heavy plants. Price on request.
Highlands Nursery grows and ships hundreds of thousands, and is American headquarters for native plants.

Catalog of Highlands Nursery

*Rhododendron punctatum

The smallest Alleghanian species, though it often attains a height of 15 feet and is wide-spreading. A very graceful shrub, with totally different aspect from the two species preceding. Leaves dark green, usually bluut and narrow, covered with rusty dots below, much smaller than either Maximum or Catawbiense. Flower clusters appear in greatest profusion in June, covering the plant with a rose-colored mantle. Fine for rocky slopes or hillsides, standing exposure unusually well, and invaluable as a single specimen or for massing with the other species.

Hardy Hybrid Rhododendrons

Having had a continued call for the hardier Hybrids, for use in planting with our native species, I have imported the best ones. By growing several seasons in nursery under favorable conditions, I have acclimated them, and this stock is as reliable as can be had.

Best Plants for the Rhododendron **Beds and for Ground Cover**

Some of the most successful are Andromeda politolia, Chamædaphne calyculata, Dendrium buxifolium, D. prostratum, Hez glabra, Leucothoe catesbæi, Pieris floribunda, Taxus minor, Galax aphylla, Gaultheria procumbens, Houstonia serpyllifolia, Mitchella repens. Shortia galacifolia, Vinca minor, V. minor alba, Xanthorrhiza apifiolia, Lilies, Trilliums, Erythroniums, Ferns, Dicentra eximia, Itis. etc. Iris, etc.

Rhododendrons Delivered at Your Station by the Carload

"Collected" and Nursery-grown

For the area covered and effect produced, a "carload" of Rhododendrons is the cheapest landscape proposition offered. I am offering an unusual grade of splendid clumps, each plant a specimen and burlapped separately. Don't accept "cheap" stock, thrown into cars without burlapping and with the fine hair-like rootlets inevitably exposed. You will be disappointed and find it exprantic in the end find it expensive in the end.

In mixed car, delivered free at any station east of Mississippi river.
Car containing 150 maximum and 150 catawbiense, "collected" as above.
1½ to 4-ft. clumps—a total of 300—for \$400.
Car containing 250 maximum and 250 catawbiense, 1½ to 4-ft. clumps—a total of 500—for \$600.
Twenty-five years' experience growing "American Plants" is at the service of my customers.

Kalmia latifolia by carload

Each specimen burlapped, and highest class clumps, "collected" from open, delivered free at your station, if east of Mississippi river.

Car, containing 400 clumps, 1 to 3} ft., for \$375. Kalmia may be added to help fill any Rhododendron car at \$1 per clump.
25,000 nursery-grown plants in all sizes. See free Catalog.

At the same cost, nothing approaches our magnificent hardy American Rhododendrons and other Native Broad-leaved Evergreens for splendid foliage and flower effects. foliage and flower effects.

Lilium carolinianum (see page 20)

LILIES. Should always be ordered in spring or summer for fall shipment where possible. Many species are exhausted early and some do not ship or transplant well in the spring. L. superbum, L. canadense and L. carolinianm thrive planted in March, April or May, though September and October planting is preferable.

Catalog Salem Nurseries

Salem, Mass. On Marblehead Road

An unusually fine lot of specimen Evergreens, Azaleas, Rhododendrons, Kalmias, Andromedas, Leucothoes and Shrubs. Personal inspection is invited and special prices made for carload shipments. August to October planting for most conifers and broad-leaved evergreens noted above is very desirable.

Special selection is always charged for at prices to suit the material, with packing at cost, and in Rhododendron catawbiense, R. maximum and Azalea arborescens the most exacting requirements can be met. A visit to my Salem Nurseries will well repay the large or small buyer.

Landscape Department

Visits are made for consultation and advice, to make surveys, designs and planting plans. Entire construction, planting and carrying out of Landscape work of all kinds undertaken, and charges will be found reasonably consistent with good workmanship and permanent results.

The Wild Garden. The basis of all the best landscape work of a permanent nature must be Native Plants and particularly where naturalistic effects are desired. If this fact is ignored, tame and fleeting results will follow. I make a specialty of wild gardening and my long experience is here of greatest value. Every garden or estate has its own peculiar problems and a discussion of details may prove helpful in unexpected ways. Address,

HARLAN P. KELSEY
